

BENEFITS

- **Efficient** – user can take the iPad out on the plant site with multiple loop check packages and view add/confirm loop check data.
- **Fast** – find and view instrumentation data in seconds
- **Secure** – instrumentation data is view only
- **View loop data, take photos, enter data to loop check sheets** without a Wi-Fi connection to display data
- **View external documents** saved on a file server and/or within a Document Management System

EASY TO USE

- Intuitive user interface
- Instrumentation data available at the touch of a finger. Do it all with just a swipe, pinch or tap.

100% SPI COMPLIANT

- Compatible with Engineering or As-Built/Owner Operated databases
- Version independent. Supports SPI v2016, v2018, v2019
- Compatible with Oracle and SQL databases

SIMPLE SEARCHING

- Search for any item anywhere in the plant hierarchy
- Displays tag, loop and wiring properties and associated documents
- Generates loop drawings and terminal strip diagrams

INView Anywhere[©] INLoop Check[©]

A WISETOOLS MOBILE PRODUCTIVITY TOOL

INView Anywhere is a mobile solution that runs on an iPad and powers **INLoop Check**. INView Anywhere provides a view (read-only) of current SPI data, without requiring Wi-Fi everywhere on the plant site.

Using a simple search, instrument technicians can find any item; tags, loops, panels or cables anywhere in a plant, area or unit and easily view:

- ✓ All required tag, loop, P&ID, panel and cable properties including UDFs and UDTs.
- ✓ Related documentation such as datasheets and loop diagrams, etc.
- ✓ Wiring diagrams such as loops and terminal strip connections; quickly navigate to adjacent strips.
- ✓ SPI data is delivered to INView Anywhere via Wi-Fi in data packages created by INSynch Admin.
- ✓ Captured data is uploaded to **INSynch Admin** for viewing and managing through a web portal called **INSynch Review**.

INLoop Check, powered by INView Anywhere, enables instrument technicians to easily perform pre-commissioning loop checks on SPI instruments in the field.

Benefits:

- perform **paperless loop** checks on-site without requiring Wi-Fi,
- view **multiple loop** check packages and loops contained in one or more data packages,
- view loop properties including UDFs and UDTs,
- view all instrument tags and check sheets related to a specific loop,
- view related SPI documents such as datasheets, P&IDs, etc. and also those documents saved externally to SPI on a file server or document management system,
- easily identify the status a data package, a loop or a tags by the color of the icon,
- enter data directly onto the check sheets by typing in data, clicking a check box or selecting from a drop-down list,
- loop check sheets are simpler to use:
 - automatically populated with required SPI design data
 - include only the required data fields for the specific instrument type
 - sheets are assigned to instruments based on its instrument type and whether they are a field or control device
- upload completed loops to INSynch Admin and view data in the INSynch Review web portal,
- INSynch Review administrator can manage the results with real-time reports and loop statuses.

INView Anywhere[®] INLoop Check[®] continued.....

REQUIREMENTS

- **Apple iPad or iPad mini:**
 - Wi-Fi enabled
 - 32 GB or 64 GB (preferred)
 - iOS 13 +
- **INSync Admin:**
 - **Client:**
 - Windows v7.x, v10.x
 - .NET Framework 4.5x
 - PDF Reader
- **DB Server**
 - Windows Server 2016, 64 bit
 - MS SQL Server Express v3.5.79+ or MS SQL Server v2014
 - SQLite ODBC Driver v3.x; 32 bit
 - Oracle .NET Access Component (ODT) v11.x (if Oracle SPI database)

OTHER PRODUCTIVITY TOOLS

- INAuditPro
- INView / INView API
- INDigital
- INP&ID
- INSync Admin / Review
- INField Check / INWalkdown - Instruments
- INFront

WISETOOLS SERVICES

- SPI Consulting
- SPI Data Migration
- SPI Data Merging
- SPI Database Audits
- SPI Document Conversion
- Training for SPI and WiseTools Products
- Custom Programming
- SPI Upgrades

Tablet Interface

The screenshot shows the 'Loop 15-E-1121' properties on a tablet. A list of loops is on the left, with '15-A-1101', '15-E-1121', and '15-X-1581' visible. A blue callout bubble points to the list with the text 'Loops in package'. Another blue callout bubble points to the 'Related Items' section with the text 'Tags related to selected loop'. The 'Properties' section shows details for 'Service', 'Drawing', 'Unit Name', 'Measured Variable', 'Function', and 'Type'. The 'Related Items' section lists various tags like '15-EHS-1121A', '15-EHS-1121HY', etc. The 'Documents' section lists documents like '10-00-WI-48- LFT Wot' and '10-50-PID-49-1028-0'.

Properties and Tag Documents

The screenshot shows the 'Loop 14-L-1105' properties on a tablet. A blue callout bubble points to the 'Related Items Documents' section with the text 'Available related documents and loop check sheet icons'. The 'Properties' section shows details for 'DS Rev Create by', 'DS Rev Check by', 'DS Rev Approved by', 'Serial Number', and 'Related Items Documents'. The 'Related Items Documents' section lists documents like 'AI - PCS', '10-40-CED-48-0001-002_R0E.pdf', '10-40-DC-48-0079-001_R0', '10-40-JIL-48-0013-001_R0C.pdf', '10-40-PID-49-0051-001', 'ED48-14-LT-1105', 'ED49-14-LT-1105-001_R0A.pdf', and '10-40-DC-48-0079-001_R0'.

Loop Check Sheet

The screenshot shows the 'Loop Check Sheet' form on a tablet. The form is divided into sections: 'FORM TYPE', 'FIELD FORM', 'TAG NUMBER', 'INSTRUMENT TYPE', 'CHK', 'VALIDATION', 'Calib Range', 'Fail Direction', 'Model #', 'Test Method', 'Process Simulation', '4-20 mA at Xmitter', 'Forced (HART)', 'Cal Gas', 'AMS', 'Concentration', 'Test Equipment Used', 'INITIALS', 'Loop Check Status', 'Document Markup Classification', and 'Field Loop Failure Classification'. A blue callout bubble points to the 'Test Method' section with the text 'An AI Field Check Sheet. Yellow data comes from SPI'. The form includes checkboxes for 'Ready for Commissioning' and 'Document Markup Classification'.

INSync Review – Loop Check Portal

The screenshot shows the 'INSync Review – Loop Check Portal' interface. It features a table with columns: 'Loop Name', 'TCP#', 'Unit', 'Issued for Completion Date', 'Review Approver', 'Field Checker', 'Control Checker', 'Last Download Date', 'Last Upload Date', 'Package Name', and 'Package Status'. A blue callout bubble points to the 'Issued for Completion Date' column with the text 'Filter view for all loops sent to the completions DB'. The table shows data for loops 10-A-1101, 10-A-1106, 10-A-1108, 10-A-1109, and 10-A-1110. At the bottom, it says 'Showing 1 to 10 of 12,820 rows'.
